Notice to our families:

Re: Consent for Treatment

In order to deliver the best quality healthcare to your children under the age of 18, we are implementing the following policies regarding consent and access to care.

- 1. We require that a parent or legal guardian be present at all non-urgent or routine visits** (well exams, sports physicals, medication follow-ups).
- 2. For urgent appointments which are not planned in advance, we require a dated and signed consent form by a parent or legal guardian if they cannot be present.** If a friend, relative, or daycare provider brings your child to our office they must provide a signed consent, all insurance information, payment for any co-pay or charges due, and a phone number where a parent can be reached. In addition, the person bringing the child for an appointment must be informed about the history of the child's problem. Signed consent is also required for teenage patients 16-18 years of age presenting for an urgent visit alone.

We will be happy to provide you with "Consent for Treatment" forms or you may access them on our website under the forms tab.
